

# D&G's Total Data Protection Plan

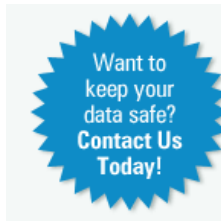

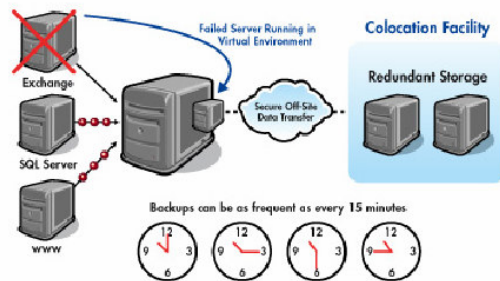

**It's the only SMB Data Protection Plan backed by hands-on service from a leading SMB IT management team**

Your business data is too valuable to leave its safekeeping to chance. That's why the team at D&G has created the only data protection plan that exclusively meets the needs of small businesses, and is backed by our commitment to Remarkable Service

**It's the most complete data protection plan on the market**

## D&G's Total Data Protection Plan includes:

- ◇ **Local back up** – automatic, reliable back up of all data and applications to a local NAS
- ◇ **Quick Recovery Business Continuity Capability** – the ability to recover the smallest files or entire servers within an hour
- ◇ **Disaster Recovery Capability** - offsite replication of data to two secure data centers

**It's the fastest, safest, and most reliable option on the market.**

- ◇ Are you still using unreliable tape backup systems?
- ◇ Is one of your employees taking tapes home every once in a while to "protect" your business in case of a disaster?
- ◇ Are you sure that all of your critical data is being backed up by your current backup process?
- ◇ Are you paying for upgrades, new tapes, software agents, and ongoing maintenance of your current back up system?

Remove the risks of traditional backup systems from your business with the D&G's Total Data Protection Plan, and these and other issues will no longer be a factor for your business

**Protect your Server for \$100 per month.**
